

SPECIFICATIONS

With Aluminum Tees from GLT Products, we virtually eliminate on-the-job fabrication time because our tees come in 10 sizes to cover 63 combinations of pipe sizes. Aluminum Tees from GLT Products are manufactured from .024" Aluminum and designed to offer a custom like fit with off-the-shelf convenience and pricing.

Features and Benefits

GLT 2-piece Aluminum Tee covers are applied faster than any other type of tee cover because they are pressed to form two matching halves. Insulation does not need to be routed or rasped at the throat. That means that unnecessary adjustments normally made during installation are minimized or even eliminated.

- Fewer seams require less caulking which allow greater resistance to water penetration.
- Faster application which means less time on the job.
- Conforms to ASTM designation C-450 method of fabrication which insures close and correct fitting products.
- Factory fabrication eliminates material waste, and saves time and labor.
- Moisture barrier coating applied to the underside for resistance to electrolytic degradation.
